

Topcoat Hygiene

3-4 mm Anti-Slip Epoxy Screed with Decorative Flake

Topcoat Hygiene is based on BioCote® Silver Ion technology giving a seamless floor finish that inhibits the growth of bacteria moulds and fungi on the floor surface.

Topcoat Hygiene is specially designed for use in commercial food preparation and storage areas. It is a seamless hygienic Epoxy self levelling screed with an anti-slip textured finish.

The system can be covered at floor to wall joint to provide an easy clean finish.

The system consists of:

- Concrete sub floor is prepared by dust free shot blasting or diamond grinding
- Epoxy high penetration Topcoat Primer 2000 is applied
- An Epoxy scratch coat is trowelled onto the floor to remove surface imperfections. This consists of a mix of epoxy Primer 2000 and Quartz aggregate
- Self levelling Epoxy screed Topcoat 2000 is applied in selected colour.
- Coloured decorative flake is applied
- Clear anti-slip textured finish is applied

Applications: Retail, Supermarkets, Kitchens, Canteens, Toilets, Locker Rooms, Hospitals, Food Processing Areas

Screed Colours: Battleship Grey (dark Grey), Gunmetal Grey (light Grey), Leaf Green, Marine Blue, Sky Blue, Honey Yellow, Sand Yellow, Tomato Red, Tile Red
